

BISHOP GADSDEN

Bishop Gadsden Coronavirus (COVID-19) Statistics

As of January 11, 2021

Today we received notice of three asymptomatic positive COVID-19 tests, one cottage resident, a health care team member, and an EVS team member. Both team members had previously tested negative last week, and last worked today. The cottage resident was already in quarantine due to recent travel, and had previously tested negative last Friday. Additionally, as reported last week, we had three additional team members test positive after last Monday's statistics were distributed.

We have had two successful COVID-19 vaccine clinics, where more than 650 vaccines distributed. Currently, 100% of our Myers Hall, Arcadia Close, and Read Cloister residents have received their first dose of the Moderna COVID-19 vaccine, as well as 85% of our Apartment and Cottage Residents, and 50% of our team members. **We are anxiously awaiting word from CVS on when they can schedule a third clinic for those outstanding Apartment and Cottage residents, as well as team members.**

Please remember, while it is wonderful that many have been vaccinated with the first dose, that is only partially effective until you receive the second dose. Therefore, proper precautions will need to continue until we receive guidance from the CDC. This means masks continue to be required, along with social distancing and proper hand washing.

Current Total Active Cases*

<u>Apartment and Cottage Residents</u>	<u>Health Care Residents</u> <i>(Myers Hall, Arcadia Close, Read Cloister)</i>	<u>Team Members</u>
2	0	7

**An active case includes an individual diagnosed with COVID within the last 10 days, or an individual who continues to have COVID related symptoms more than 10 days beyond the diagnosis date.*
